

Who's on the Program?

The following companies were a part of the first two legs of our journey – a period we describe as Pipedream to Mainstream as it is symbolic of going from a time where only a small few were willing to proactively seek out and/or embrace change, to a period where a lot of what we were doing hit mainstream and became trendy. While this was not quite our dream, setting a precedent to create a friendly force for change is precisely what we are about, and thus witnessing the impact that each and every new addition here had on the marketplace, was exciting to say the least. In particular, the main area that was noticed and took hold was the introduction of biodegradable packaging.

While Green Shift was the first company in Canada, and even North America to introduce much of this, these companies were the first to putting it to use. We would like to thank, and recognize these companies and institutions for being proactive and sticking their neck out when very few others would.
